TEAM 07 / OUTLOUD / PR #31

The app, *as captured.*

A navigable diagram built from the app running on the connected Android phone. Every screen image below is an unmodified device screenshot.

Source	PR #31 · f1af9dd9737e
Package	com.team07.outloud
Device	Samsung Galaxy S23 Ultra / R3CW20SNFXV
Capture	Physical Samsung phone running the installed Scribe release; all 112 bundled application source modules match PR #31 f1af9dd. Earlier saved-data captures are retained alongside a later authorized synthetic demo.

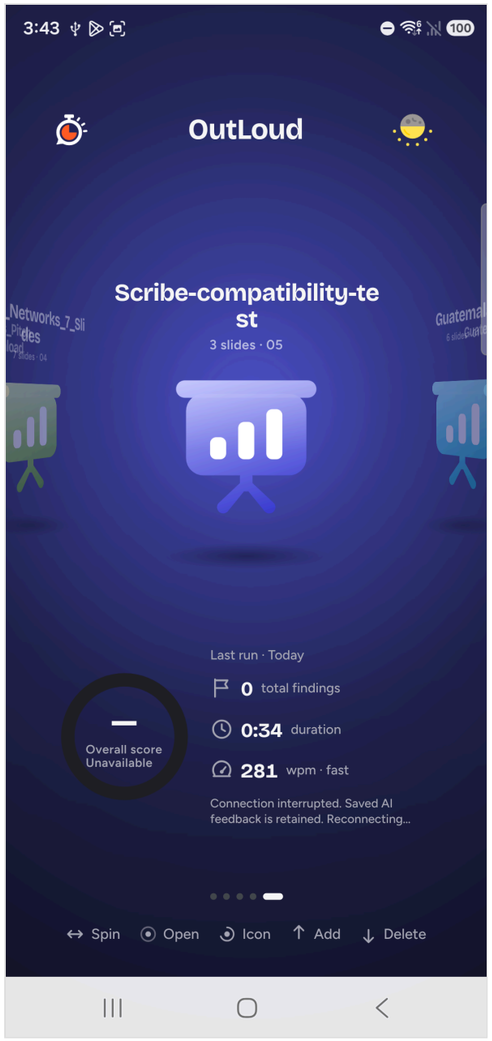
15. Compare → Slide review

S18 Home · presentation library

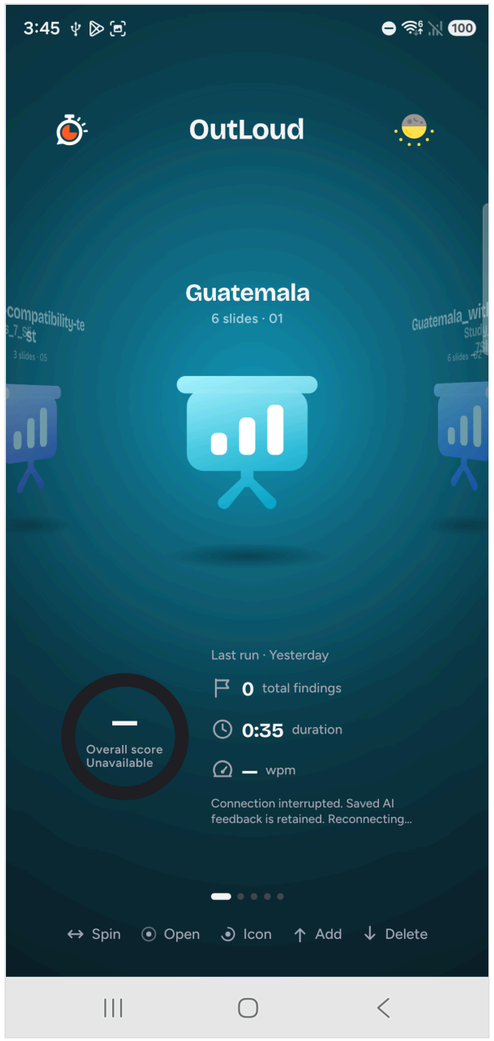


home · Earlier saved data — 1080 × 2316 · PNG

- Returned to the saved five-presentation carousel.
- Shows the selected presentation's existing summary and app gesture controls.

S18.1 Open selected presentation → S13 · Rehearse · saved presentation
S18.2 Pull up to Add → S21 · Add presentation · PDF import entry
S18.3 Hold selected icon → S19 · Presentation icon picker
S18.4 Open About → S20 · About OutLoud · credits
S18.5 Tap assessment ring → S26 · Full Review · presentation score and assessment
S18.6 Spin carousel → S24 · Home · another saved presentation

S24 Home · another saved presentation

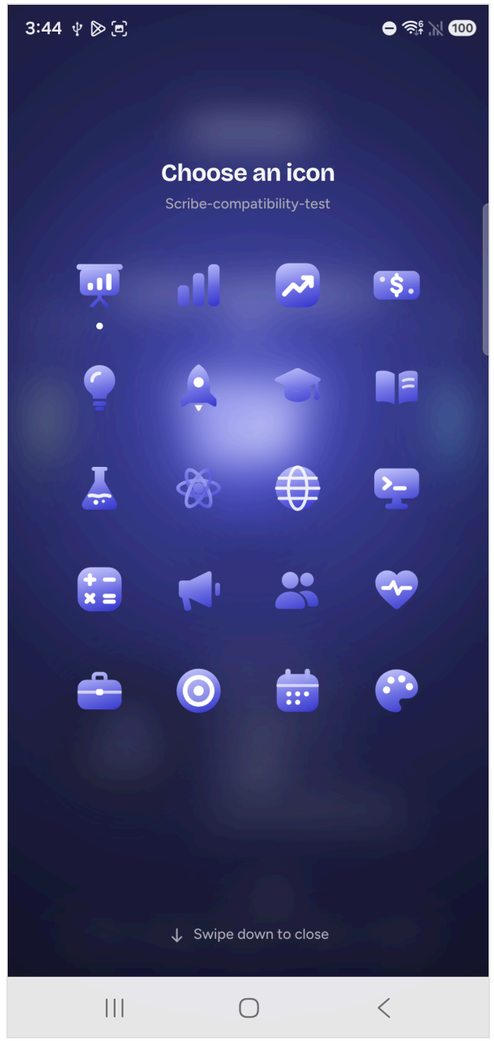


home · Earlier saved data — 1080 × 2316 · PNG

- Spun the existing carousel from the fifth deck to the first.
- The saved Guatemala presentation and its existing summary are shown; no presentation was added or removed.

S24.1 Open this saved presentation → S25 · Rehearse · another saved PDF
S24.2 Spin back → S18 · Home · presentation library

S19 Presentation icon picker



home · Earlier saved data — 1080 × 2316 · PNG

- Opened the actual icon grid with a long press.
- Dismissed without choosing an icon or changing the saved presentation.

S19.1 Back / close picker → S18 · Home · presentation library

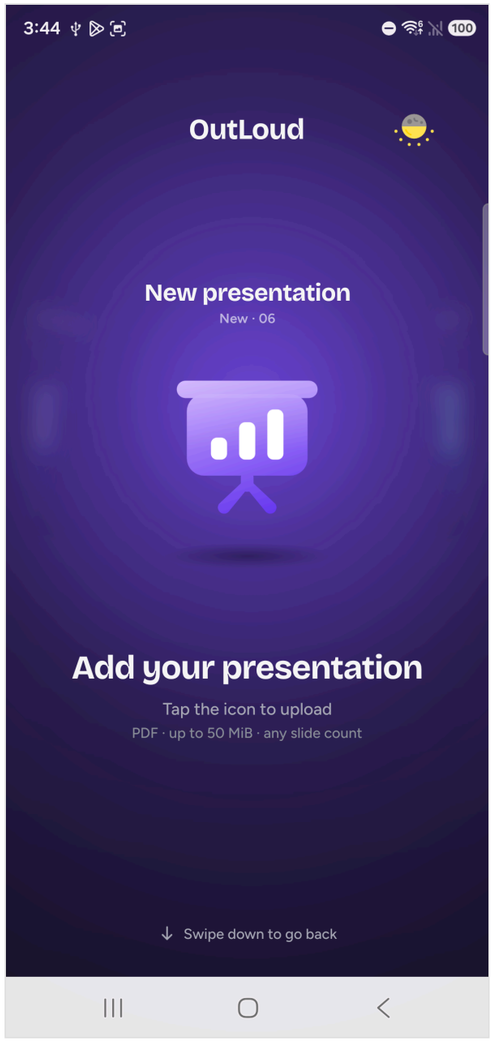
S20 About OutLoud · credits

home · Earlier saved data — 1080 × 2316 · PNG

- Opened About OutLoud from the Home brand mark.
- Closed the overlay with Back.

S20.1 Back / close About → S18 · Home · presentation library

S21 Add presentation · PDF import entry

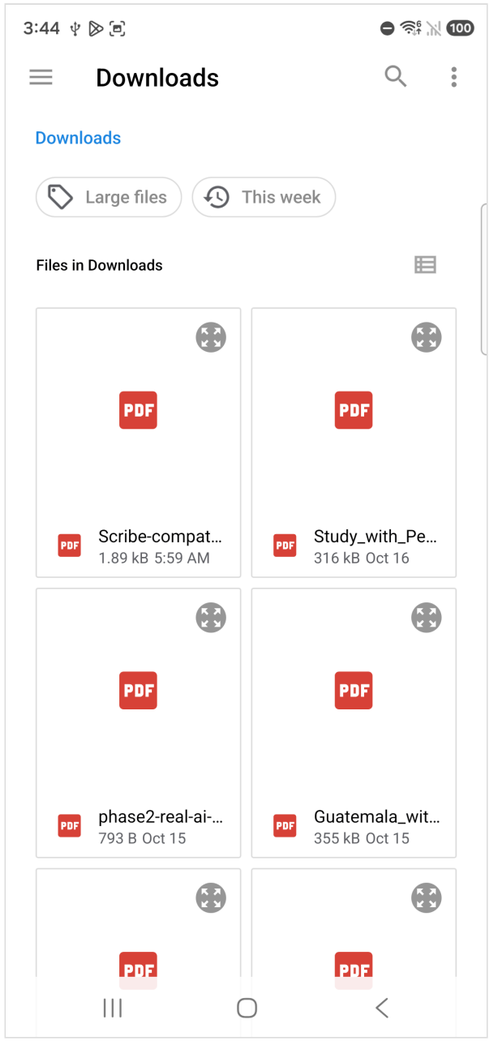


upload · Earlier saved data — 1080 × 2316 · PNG

- Opened Add presentation with the app's upward gesture.
- No new PDF was selected or imported.

S21.1 Choose PDF → S22 · Native Android PDF picker
S21.2 Back / cancel import → S18 · Home · presentation library

S22 Native Android PDF picker

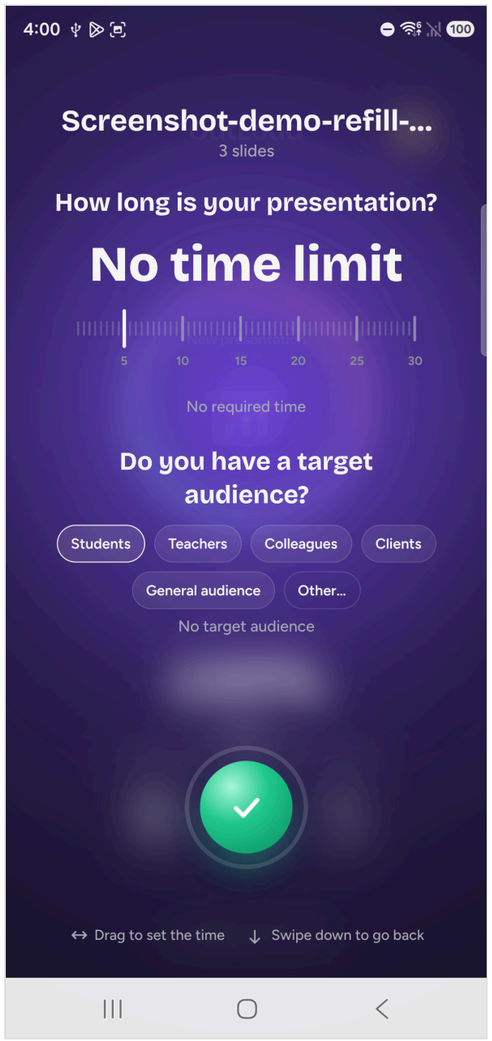


upload · Earlier saved data — 1080 × 2316 · PNG

- This is Android's system PDF picker, opened by OutLoud.
- Cancelled without selecting a file; no new presentation was imported.

S22.1 Cancel native picker → S21 · Add presentation · PDF import entry
S22.2 Later demo: select synthetic PDF and complete import → S28 · PDF import · audience and time setup

S28 PDF import · audience and time setup

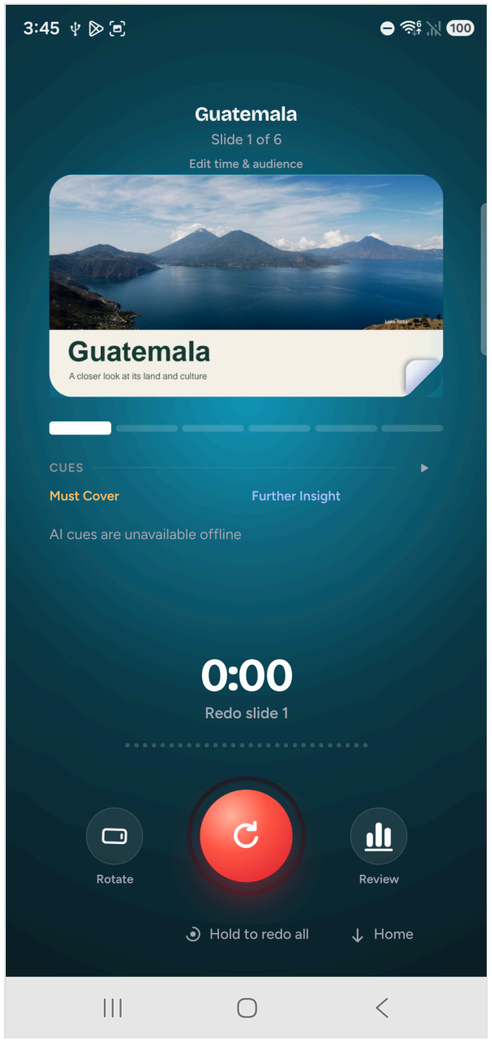


upload · New synthetic demo 1080 × 2316 · PNG

- New synthetic demo PDF imported with the user's expanded authorization.
- The actual setup screen shows three slides, no time limit, and Students selected.

S28.1 Confirm presentation setup → S29 · New presentation · ready to record

S25 Rehearse · another saved PDF

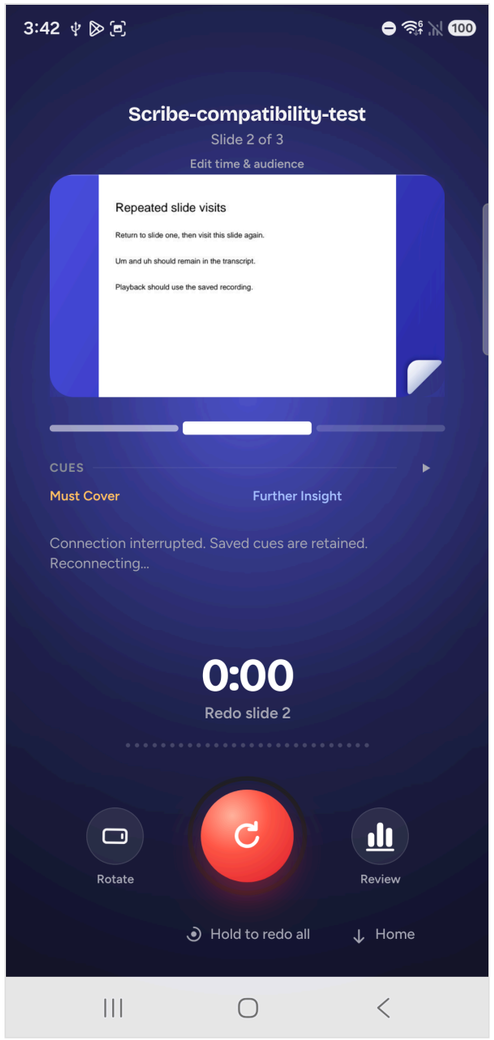


rehearse · Earlier saved data — 1080 × 2316 · PNG

- Opened the existing Guatemala presentation from the carousel.
- Shows its actual PDF cover and current offline cue state; no new recording was started.

S25.1 Back to Home → S24 · Home · another saved presentation

S13 Rehearse · saved presentation

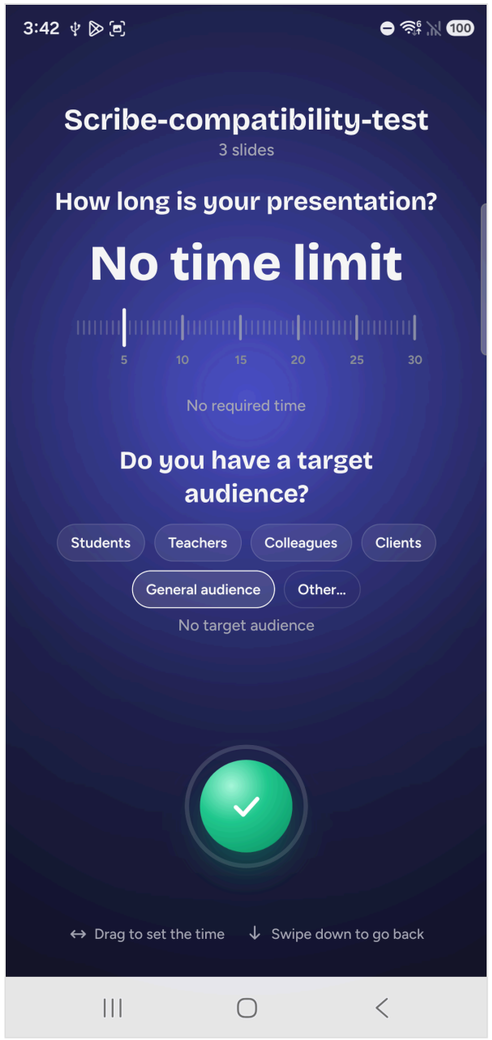


rehearse · Earlier saved data — 1080 × 2316 · PNG

- Returned to the existing presentation's second slide.
- Shows the real PDF, slide strip, cue categories, timer, Rotate, Redo and Review controls.
- No microphone capture was started.

S13.1 Edit time & audience → S14 · Presentation setup · existing time and audience
S13.2 Rotate PDF → S15 · Rehearse · rotated PDF view
S13.3 Tap Redo → S16 · Redo slide · confirmation
S13.4 Hold to redo all → S17 · Redo whole presentation · confirmation
S13.5 Open Full Review → S26 · Full Review · presentation score and assessment
S13.6 Back to Home → S18 · Home · presentation library

S14 Presentation setup · existing time and audience



rehearse · Earlier saved data — 1080 × 2316 · PNG

- Opened the existing presentation's setup overlay.
- Current choices are no time limit and General audience.
- Closed with Back without saving or changing preferences.

S14.1 Back without saving → S13 · Rehearse · saved presentation

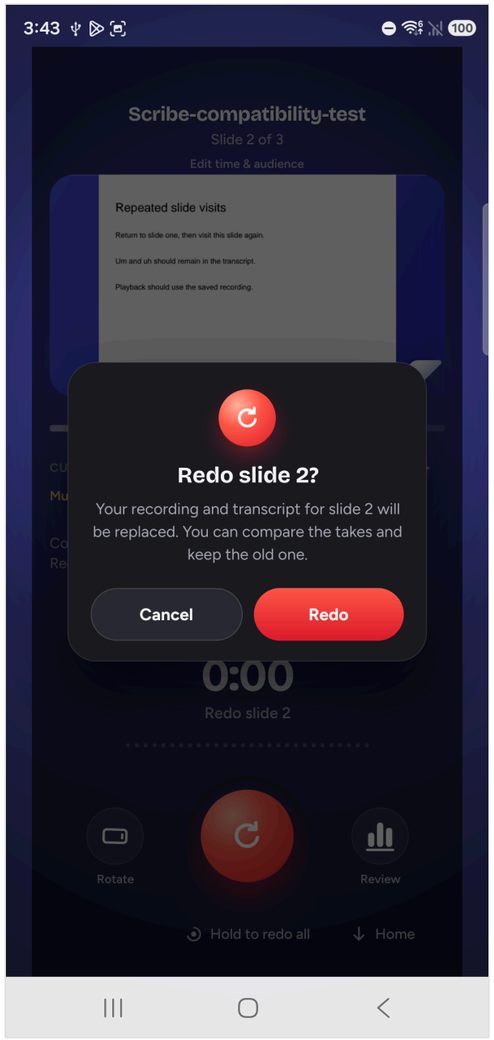
S15 Rehearse · rotated PDF view

rehearse · Earlier saved data 1080 × 2316 · PNG

- Rotated only the PDF view using the app's Rotate control.
- No recording was started; returned to normal view with Back.

S15.1 Rotate back / Back → S13 · Rehearse · saved presentation

S16 Redo slide · confirmation

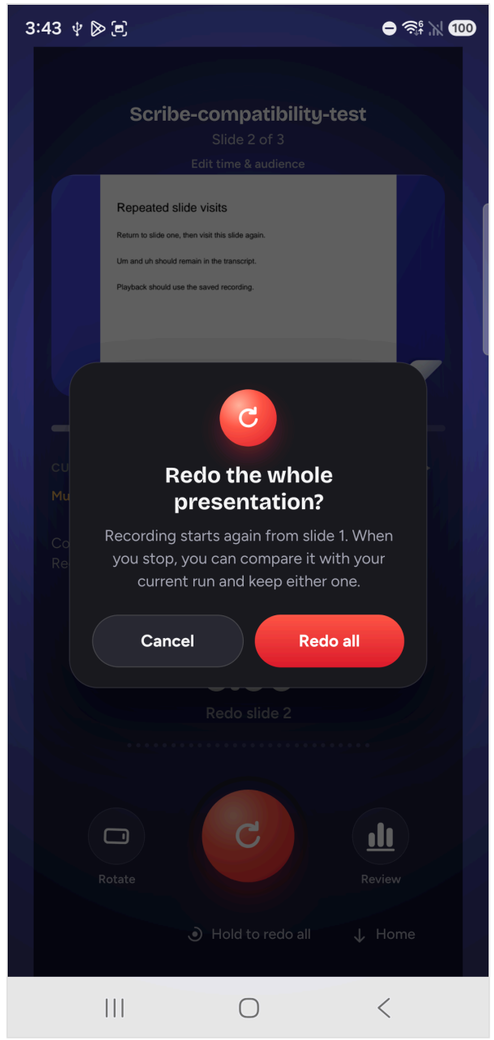


rehearse · Earlier saved data 1080 × 2316 · PNG

- Opened Redo for the existing recorded slide.
- The confirmation was cancelled; no recording or transcript was replaced.

S16.1 Cancel → S13 · Rehearse · saved presentation

S17 Redo whole presentation · confirmation

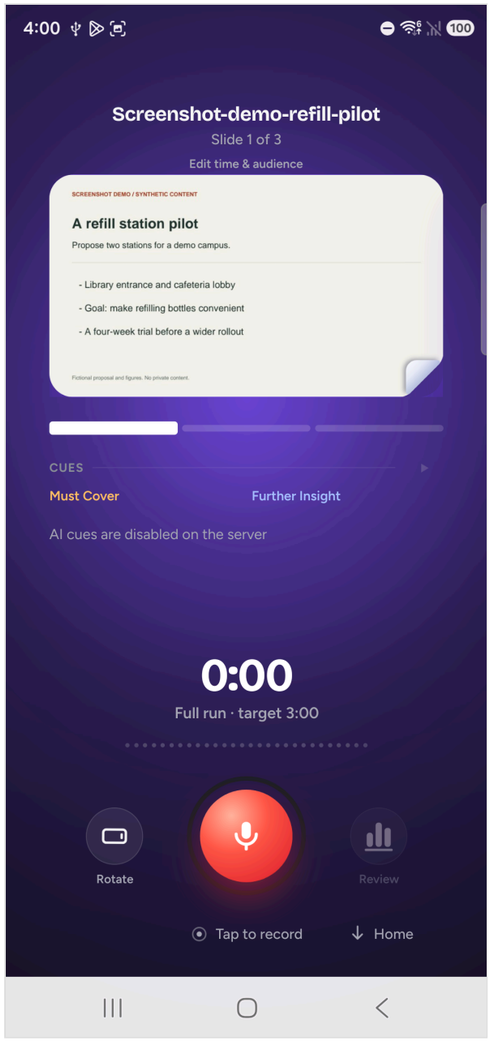


rehearse · Earlier saved data 1080 × 2316 · PNG

- Held the existing Redo control to show the app's whole-presentation confirmation.
- Cancelled without starting capture; the existing selected take is preserved.

S17.1 Cancel → S13 · Rehearse · saved presentation

S29 New presentation · ready to record

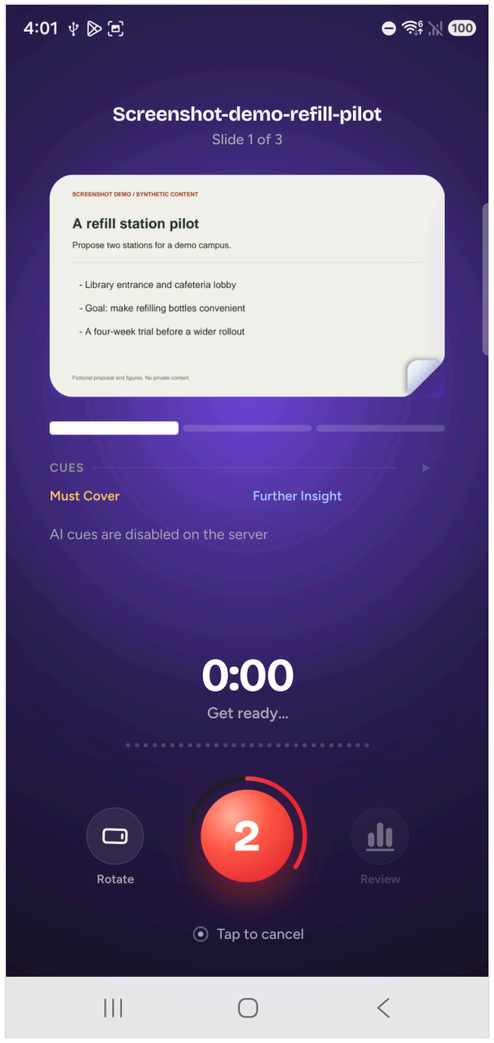


rehearse · New synthetic demo · 1080 × 2316 · PNG

- The imported synthetic demo is ready for a three-slide microphone rehearsal.
- The phone shows a three-minute full-run target and Record control.

S29.1 Tap Record → S30 · Microphone capture · countdown

S30 Microphone capture · countdown

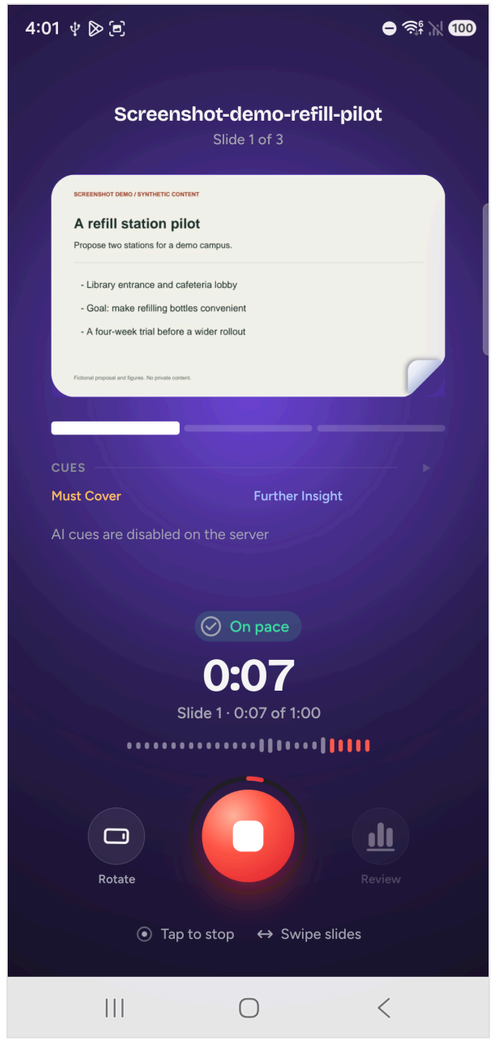


rehearse · New synthetic demo · 1080 × 2316 · PNG

- Actual recording countdown, captured before audio recording begins.

S30.1 Countdown completes → S31 · Live microphone · slide 1

S31 Live microphone · slide 1

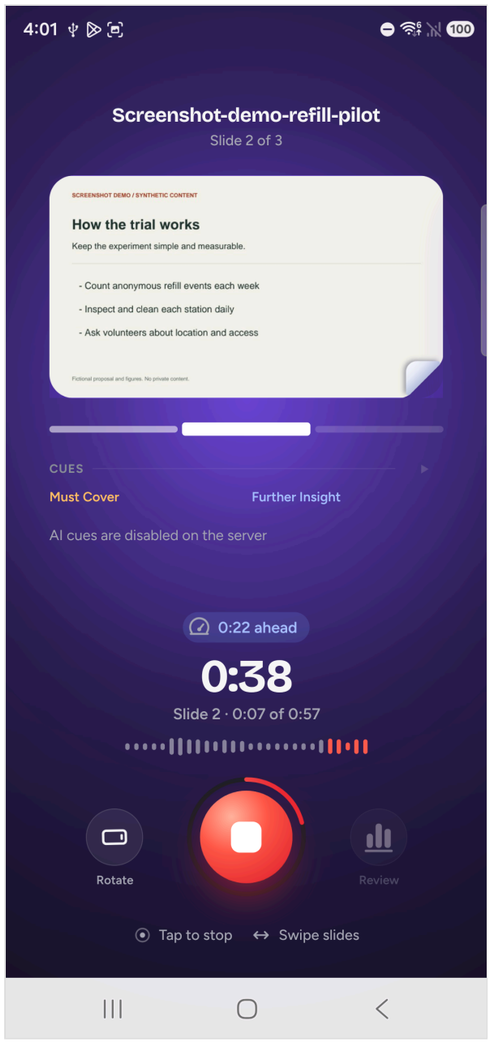


rehearse · New synthetic demo · 1080 × 2316 · PNG

- The physical phone is recording agent-operated synthetic speech played acoustically.
- The timer, recording waveform, Stop control and On pace indicator are visible.

S31.1 Swipe to slide 2 while recording → S32 · Live microphone · slide 2

S32 Live microphone · slide 2

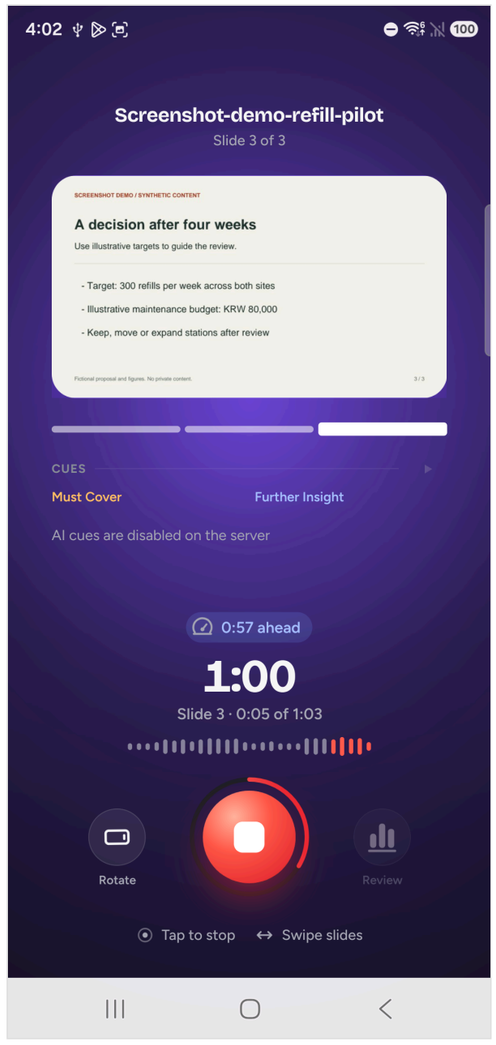


`rehearse · New synthetic demo` `1080 × 2316 · PNG`

- Audio capture continues on the second slide of the same full rehearsal.
- The actual Ahead timing cue and live waveform are preserved.

`S32.1` Swipe to slide 3 while recording → S33 · Live microphone · slide 3

S33 Live microphone · slide 3

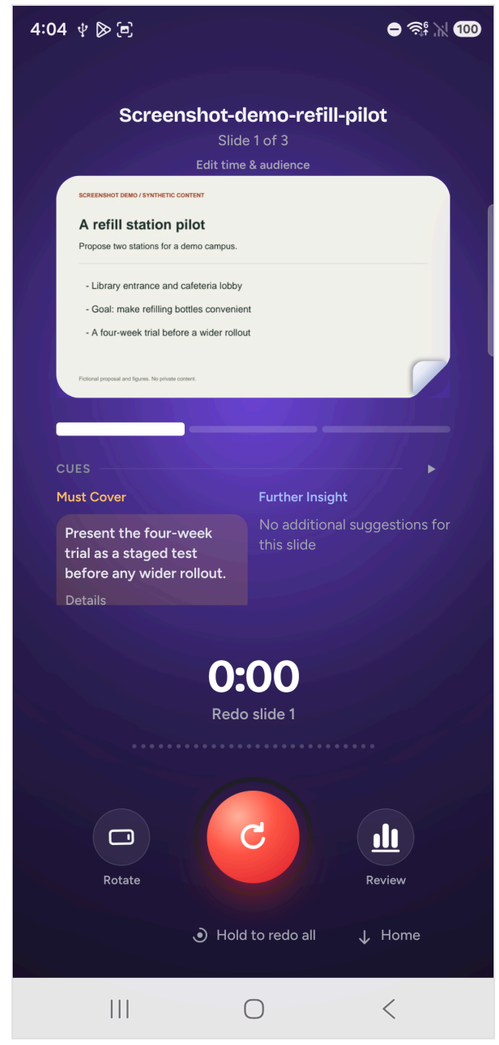


`rehearse · New synthetic demo` `1080 × 2316 · PNG`

- Audio capture continues on the third slide, with the elapsed timer and Stop control.
- This is a real microphone capture of synthetic demo content.

`S33.1` Stop and save the full run → S34 · Full Review · saved take processing

S39 Rehearsal · generated coaching cues

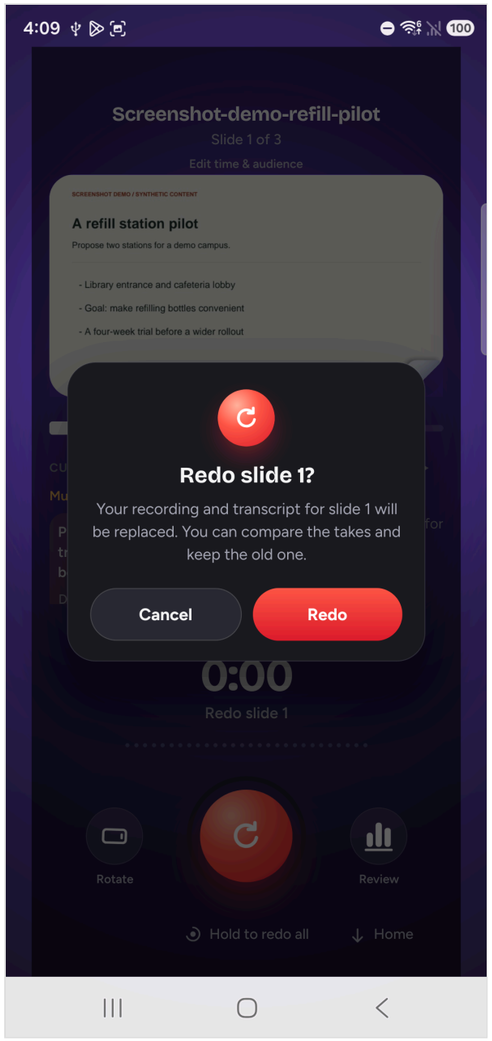


`rehearse · New synthetic demo` `1080 × 2316 · PNG`

- The demo presentation now has actual provider-generated coaching cues.
- These visible cue results were generated after the user authorized the expanded capture.

`S39.1` Open Full Review → S40 · Full Review · provider assessment in progress
`S39.2` Tap Redo slide 1 → S51 · Redo · confirm another slide take

S51 Redo · confirm another slide take



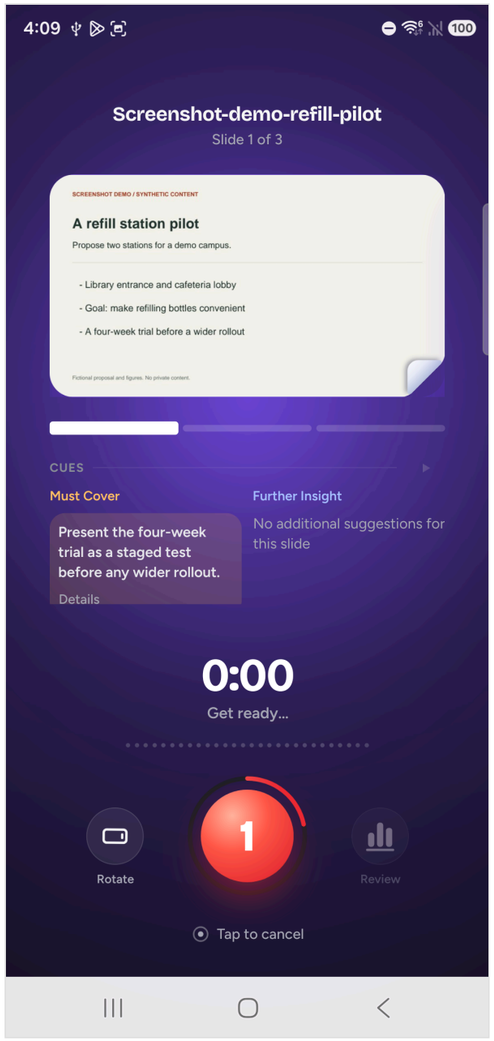
rehearse · New synthetic demo · 1080 × 2316 · PNG

- The actual confirmation explains that the redo can be compared with the existing slide take.
- This later redo uses only the new synthetic demo presentation.

S51.1 Confirm Redo → S52 · Redo microphone · countdown

S51.2 Cancel → S39 · Rehearsal · generated coaching cues

S52 Redo microphone · countdown

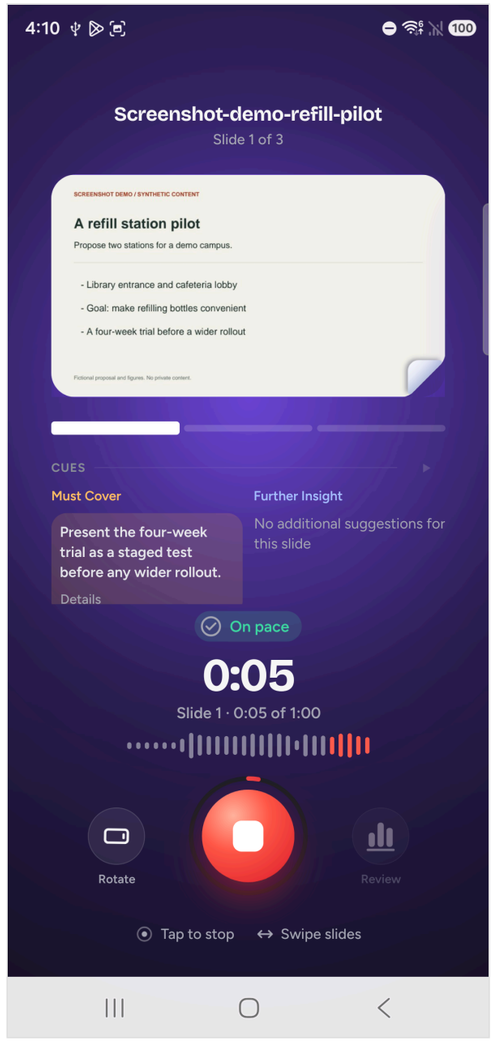


rehearse · New synthetic demo · 1080 × 2316 · PNG

- A second live microphone take begins with the real countdown.
- The earlier generated coaching cue remains visible.

S52.1 Countdown completes → S53 · Redo microphone · live slide take

S53 Redo microphone · live slide take

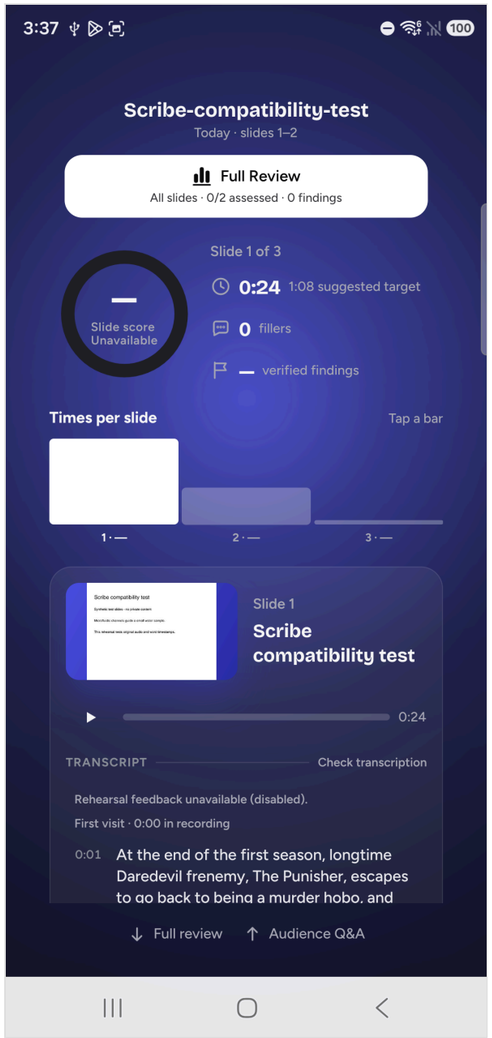


rehearse · New synthetic demo · 1080 × 2316 · PNG

- The phone is recording a second synthetic spoken version of slide 1.
- The running timer, waveform and On pace cue are actual device UI.

S53.1 Stop and compare takes → S54 · Compare · new take transcribing

S01 Slide Review

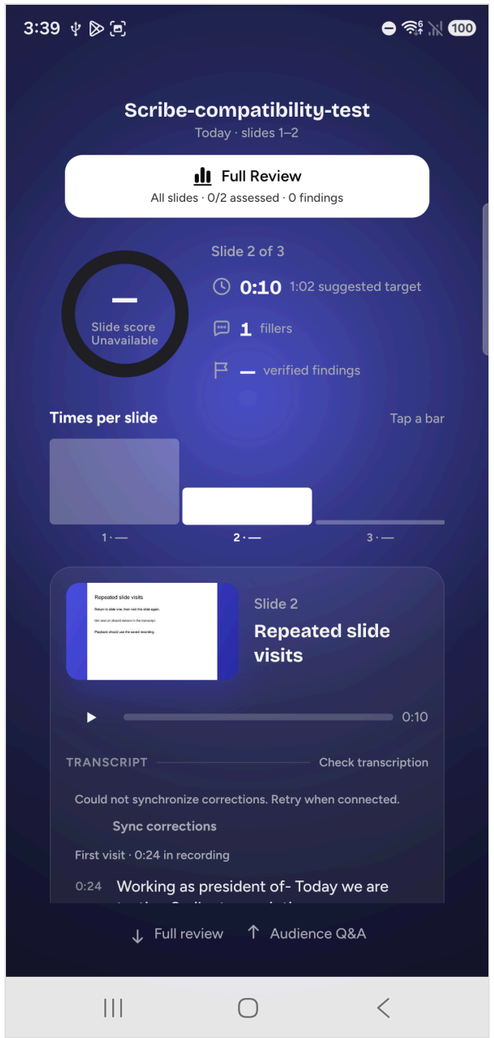


review · Earlier saved data 1080 × 2316 · PNG

- Observed existing selected-slide Review on the physical phone.
- No new recording or AI request was made.

S01.1 Full Review → S26 · Full Review · presentation score and assessment
S01.2 Tap slide 2 time bar → S04 · Slide Review · second slide
S01.3 Audience Q&A → S05 · Audience Q&A · offline / unavailable

S04 Slide Review · second slide

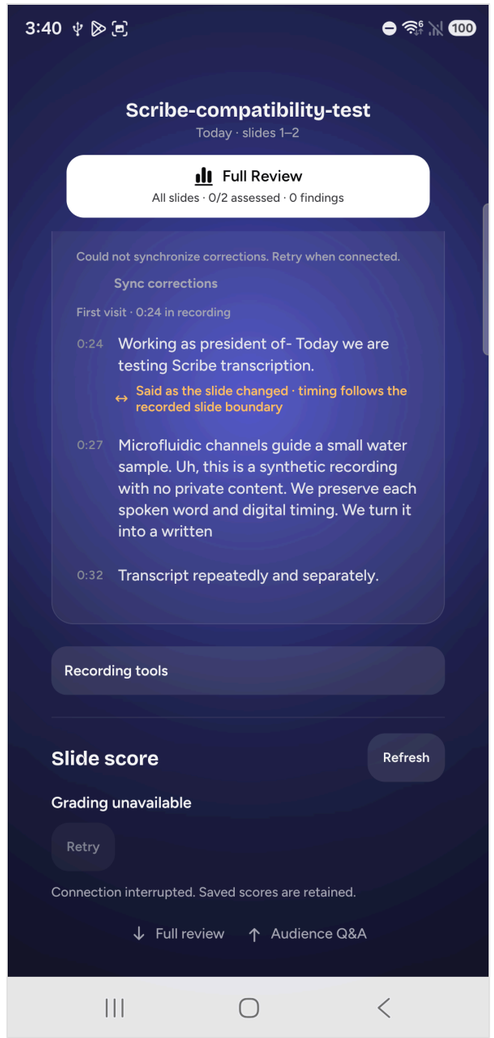


review · Earlier saved data 1080 × 2316 · PNG

- Selected slide 2 from Full Review.
- Shows the real slide thumbnail, audio control, timing, filler count and correction sync notice.

S04.1 Full Review → S26 · Full Review · presentation score and assessment
S04.2 Scroll transcript → S07 · Transcript · saved text and timing
S04.3 Tap slide 1 time bar → S01 · Slide Review
S04.4 Audience Q&A → S05 · Audience Q&A · offline / unavailable

S07 Transcript · saved text and timing

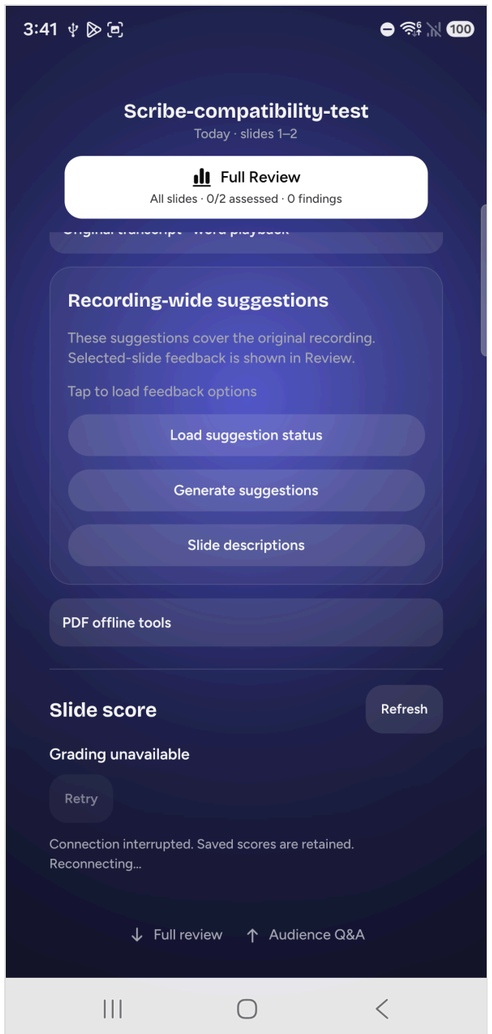


review · Earlier saved data 1080 × 2316 · PNG

- Scrolled the existing saved slide transcript.
- Shows the original slide-boundary timing notice, recording tools entry and unavailable grading state.

S07.1 Open tools and scroll → S09 · Recording tools · suggestions and offline access
S07.2 Scroll to feedback → S12 · Slide score and AI feedback · unavailable state
S07.3 Scroll to top → S04 · Slide Review · second slide
S07.4 Full Review → S26 · Full Review · presentation score and assessment

S09 Recording tools · suggestions and offline access

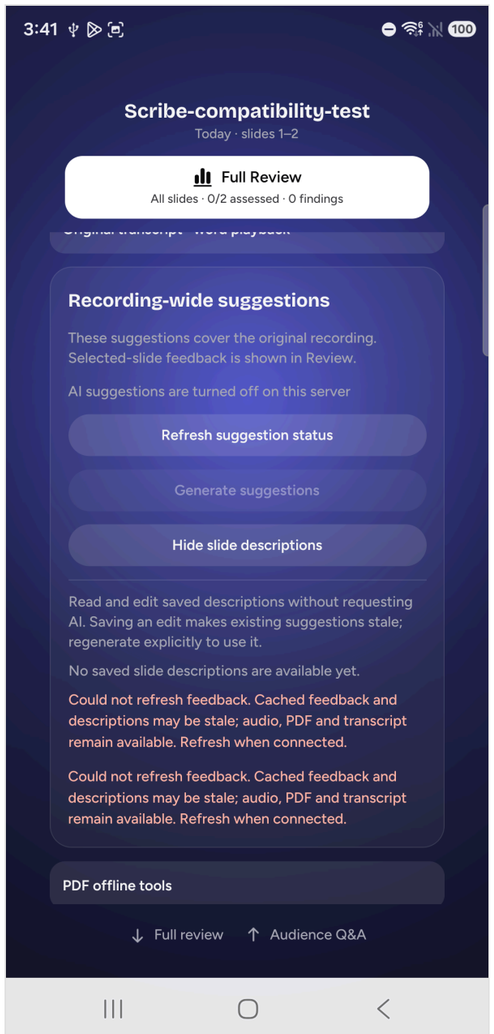


review · Earlier saved data — 1080 × 2316 · PNG

- Expanded Recording tools and scrolled to its saved-context controls.
- Generate suggestions was not pressed.

S09.1 Expand slide descriptions → S10 · Slide descriptions · current empty state
S09.2 Expand PDF offline tools → S11 · PDF offline tools
S09.3 Hide tools / scroll back → S07 · Transcript · saved text and timing

S10 Slide descriptions · current empty state

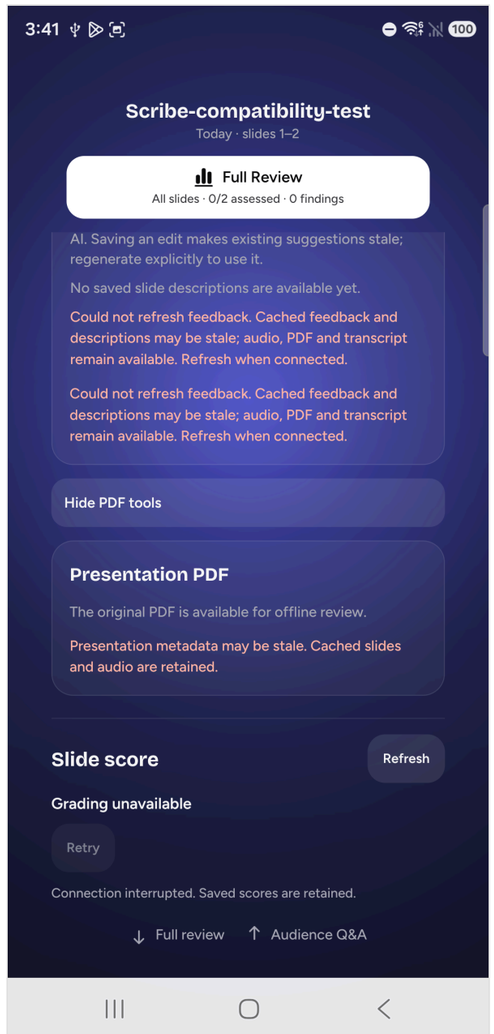


review · Earlier saved data — 1080 × 2316 · PNG

- Expanded saved slide descriptions.
- This saved presentation has no available descriptions, and AI suggestions are turned off on its server.
- No description was generated or edited.

S10.1 Hide slide descriptions → S09 · Recording tools · suggestions and offline access
S10.2 Open PDF tools and scroll → S11 · PDF offline tools

S11 PDF offline tools

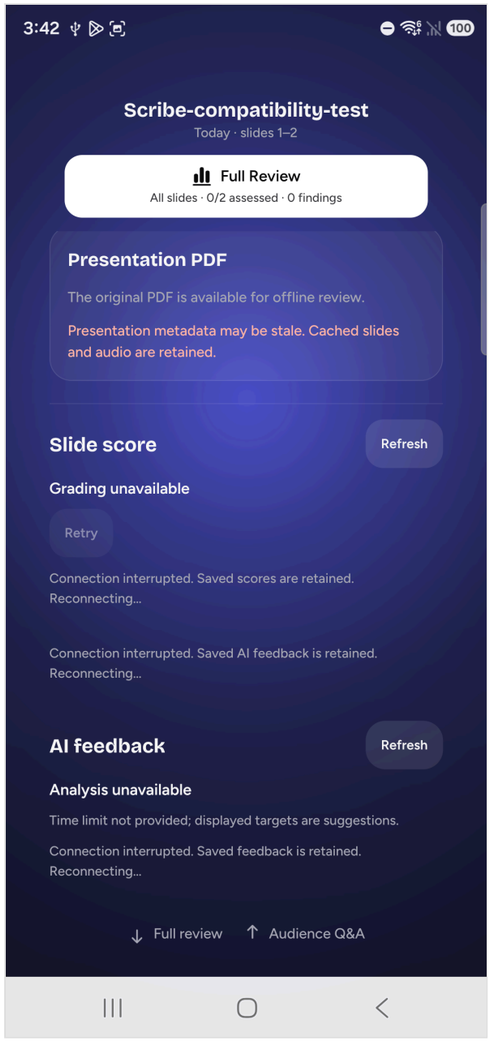


review · Earlier saved data — 1080 × 2316 · PNG

- Expanded PDF offline tools for the existing recording.
- The original PDF is already available offline; no download was requested.

S11.1 Hide PDF tools / scroll back → S09 · Recording tools · suggestions and offline access
S11.2 Scroll to assessments → S12 · Slide score and AI feedback · unavailable state

S12 Slide score and AI feedback · unavailable state

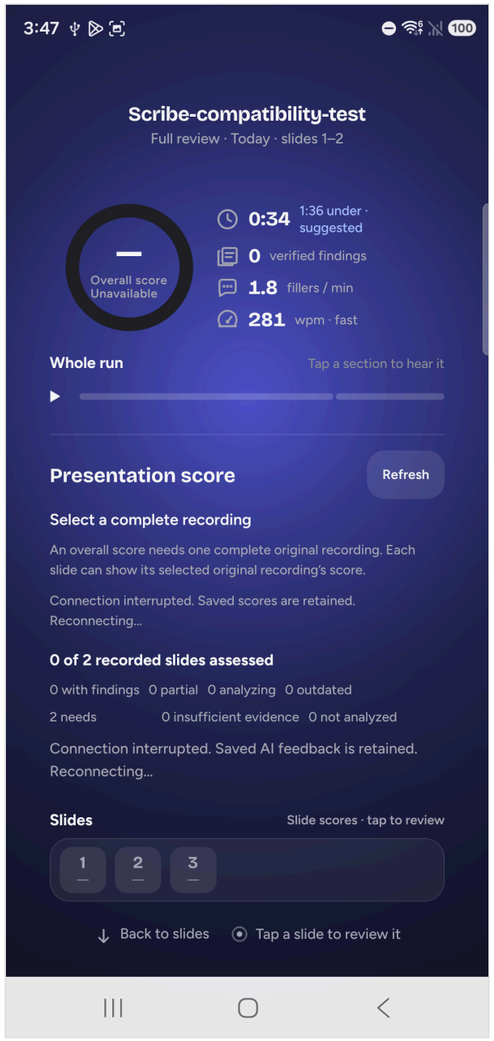


review · Earlier saved data — 1080 × 2316 · PNG

- Scrolled to the current score and selected-slide AI feedback panels.
- The real app reports grading and analysis unavailable; refresh/retry controls were not used.

S12.1 Scroll to top → S04 · Slide Review · second slide
S12.2 Full Review → S26 · Full Review · presentation score and assessment
S12.3 Audience Q&A → S05 · Audience Q&A · offline / unavailable

S26 Full Review · presentation score and assessment

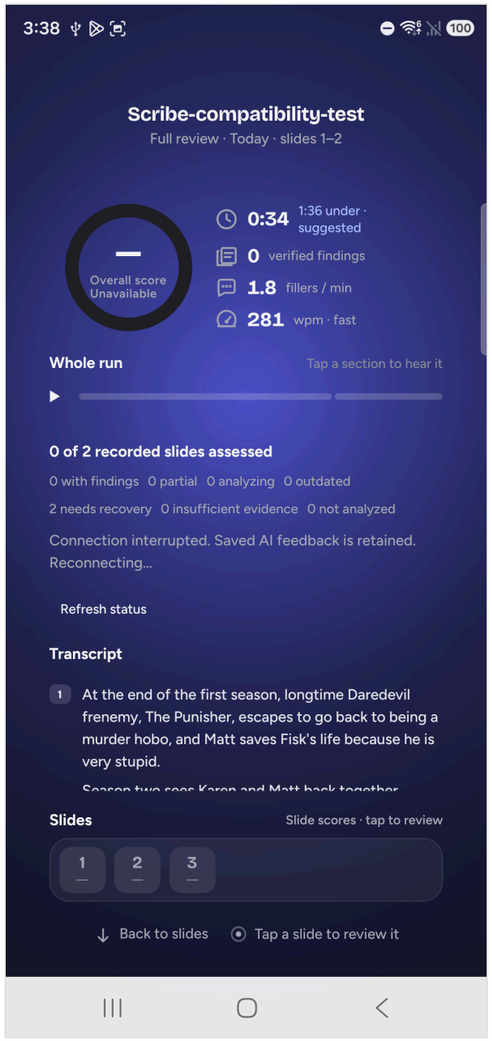


full · Earlier saved data — 1080 × 2316 · PNG

- Opened the existing run's Full Review.
- Shows whole-run playback, the real complete-recording score prerequisite, assessment counts and slide tiles.
- No score generation or retry was requested.

S26.1 Tap slide 1 → S01 · Slide Review
S26.2 Tap slide 2 → S04 · Slide Review · second slide
S26.3 Scroll to transcript → S03 · Full Review · assessment status
S26.4 Back to slides → S13 · Rehearse · saved presentation

S03 Full Review · assessment status

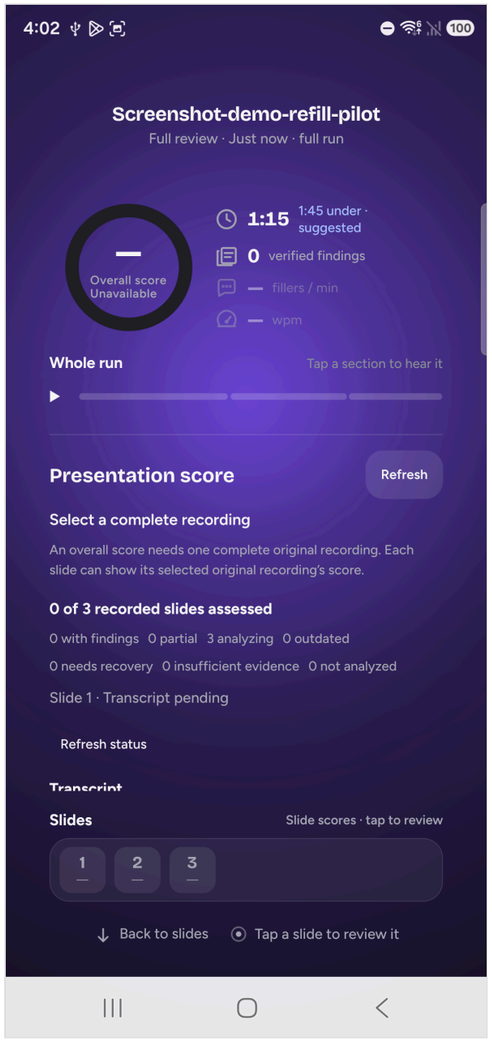


full · Earlier saved data — 1080 × 2316 · PNG

- Scrolled the existing Full Review to the assessment counts and transcript heading.
- The device currently reports a connection interruption; no successful AI assessment is implied.

S03.1 Scroll to score panel → S26 · Full Review · presentation score and assessment
S03.2 Tap slide 1 → S01 · Slide Review
S03.3 Tap slide 2 → S04 · Slide Review · second slide
S03.4 Back to slides → S13 · Rehearse · saved presentation

S34 Full Review · saved take processing

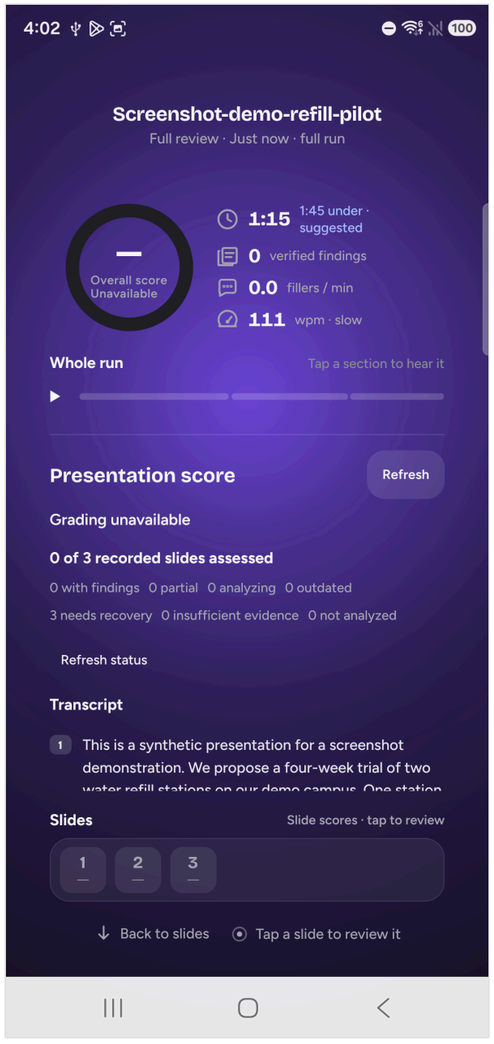


`full · New synthetic demo` `1080 × 2316 · PNG`

- The new microphone take has been saved and opened in Full Review.
- Transcription is pending; the score and assessment are not complete in this frame.

`S34.1` Transcription finishes → S35 · Full Review · transcription available

S35 Full Review · transcription available



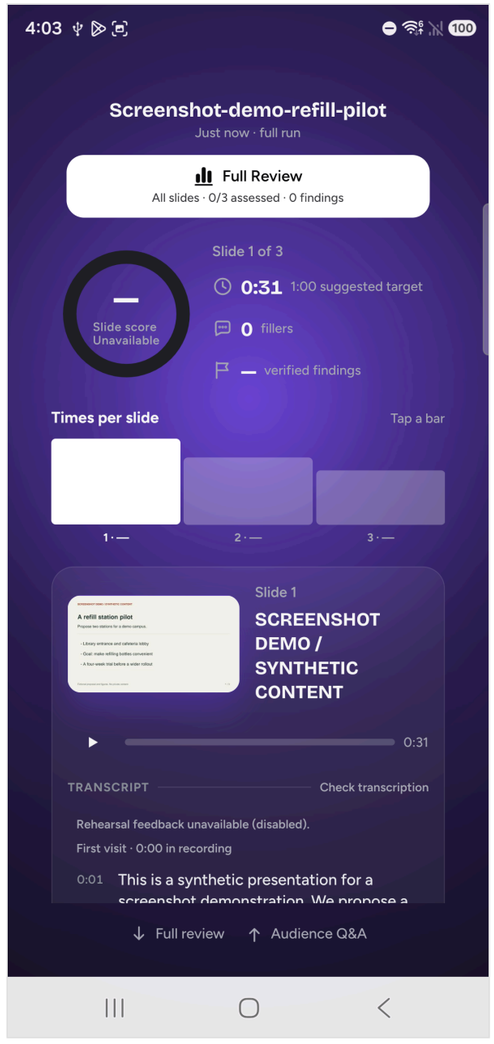
`full · New synthetic demo` `1080 × 2316 · PNG`

- A real provider transcript of the acoustic demo is now visible.
- The app reports Grading unavailable at this moment; the screenshot preserves that intermediate state.

`S35.1` Tap slide 1 to review → S36 · Slide Review · recorded demo transcript

`S35.2` Assessment starts when service is available → S40 · Full Review · provider assessment in progress

S36 Slide Review · recorded demo transcript



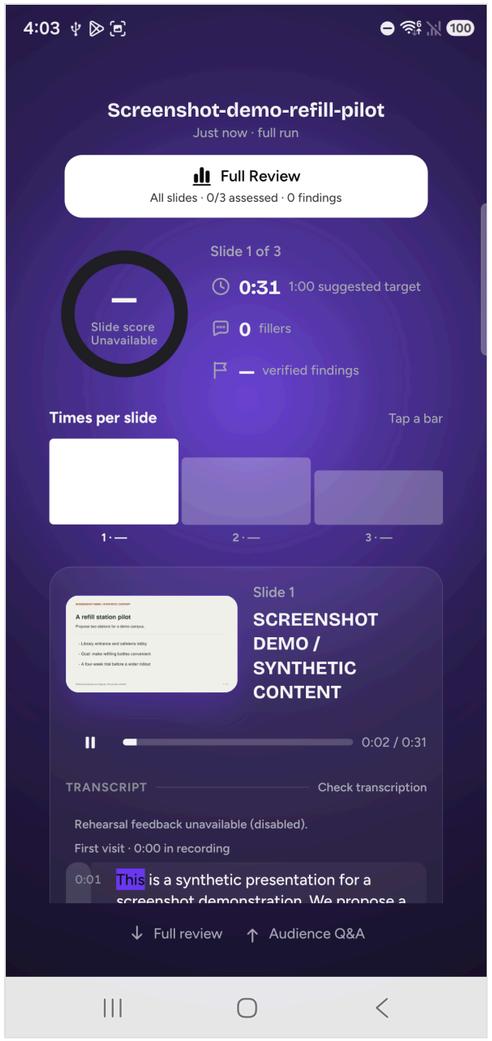
`review · New synthetic demo` `1080 × 2316 · PNG`

- The recorded first slide and its provider transcript are available for review.
- Assessment is not complete in this captured intermediate state.

`S36.1` Play the recorded slide → S37 · Slide Review · playing with transcript highlight

`S36.2` Open Full Review → S35 · Full Review · transcription available

S37 Slide Review · playing with transcript highlight

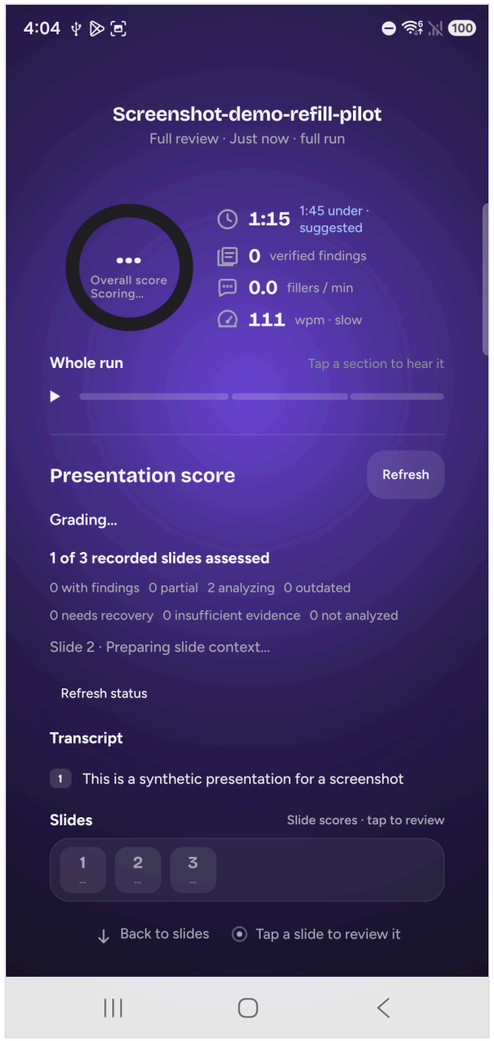


review · New synthetic demo 1080 × 2316 · PNG

- Actual saved audio playback is running with the pause control and elapsed progress.
- The current transcript word is highlighted by the app.

S37.1 Pause playback → S36 · Slide Review · recorded demo transcript
S37.2 Return to rehearsal after cue generation → S39 · Rehearsal · generated coaching cues

S40 Full Review · provider assessment in progress

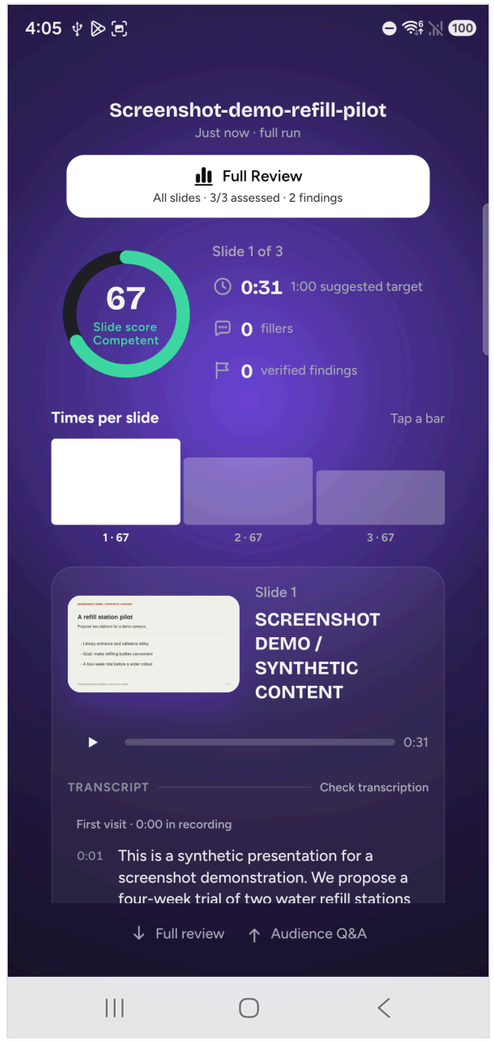


full · New synthetic demo 1080 × 2316 · PNG

- The app shows Grading and one of three recorded slides assessed.
- The numeric score has not finished processing in this frame.

S40.1 Assessment finishes; open slide Review → S43 · Slide Review · completed score and findings

S43 Slide Review · completed score and findings

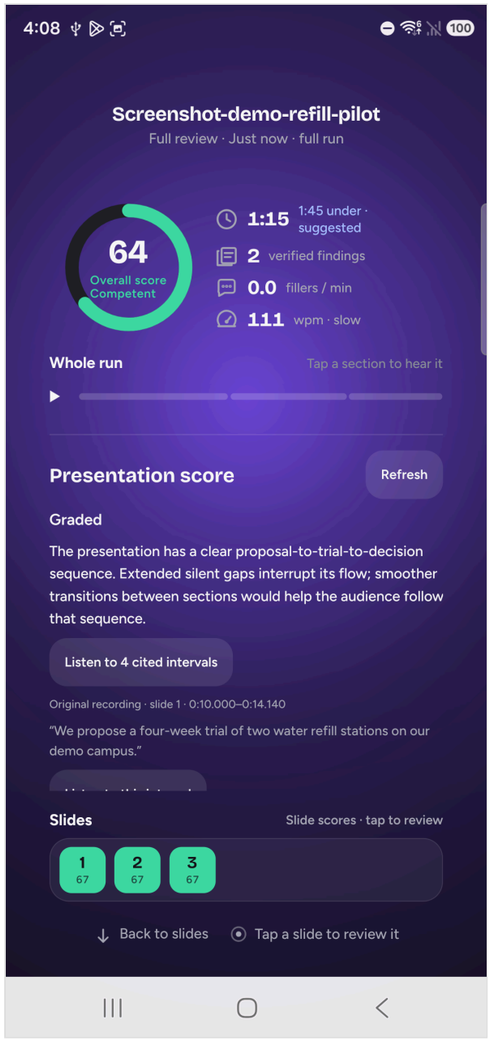


review · New synthetic demo 1080 × 2316 · PNG

- Actual provider assessment is complete: all three slides assessed and two findings across the presentation.
- This captured slide shows a score of 67 and the existing recorded transcript.
- Captured from Full Review, so Back returns there. After Compare, this Review content instead has Back to slides.

S43.1 Open Audience Q&A → S44 · Audience Q&A · generated question
S43.2 Open Full Review → S50 · Full Review · completed presentation score

S50 Full Review · completed presentation score

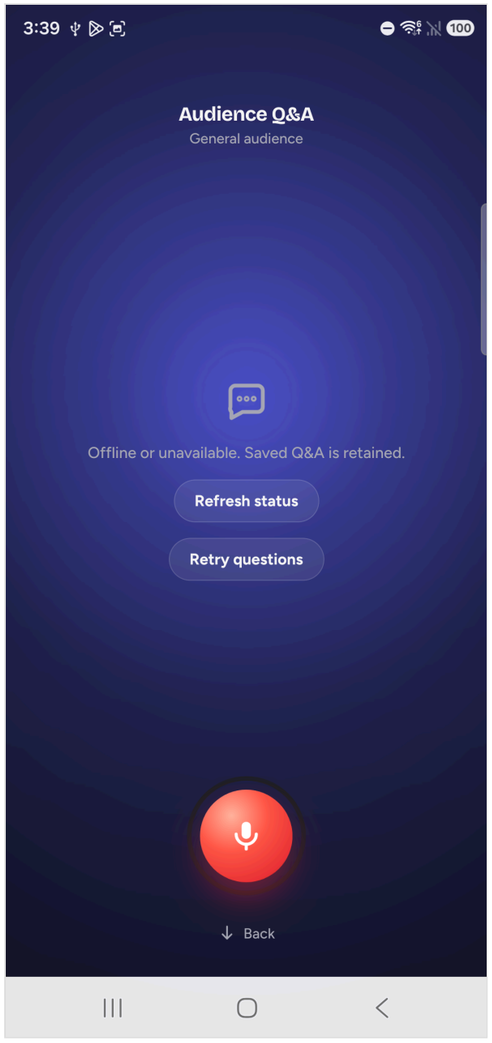


full · New synthetic demo 1080 × 2316 · PNG

- The actual provider presentation assessment shows an overall score of 64 and Competent.
- All three slide scores are 67; the graded explanation, two verified findings and cited audio intervals are visible.
- Captured from rehearsal with Back to slides. Entry from slide Review instead shows Back to review.

S50.1 Tap slide 1 → S43 · Slide Review · completed score and findings
S50.2 Back to rehearsal → S39 · Rehearsal · generated coaching cues

S05 Audience Q&A · offline / unavailable

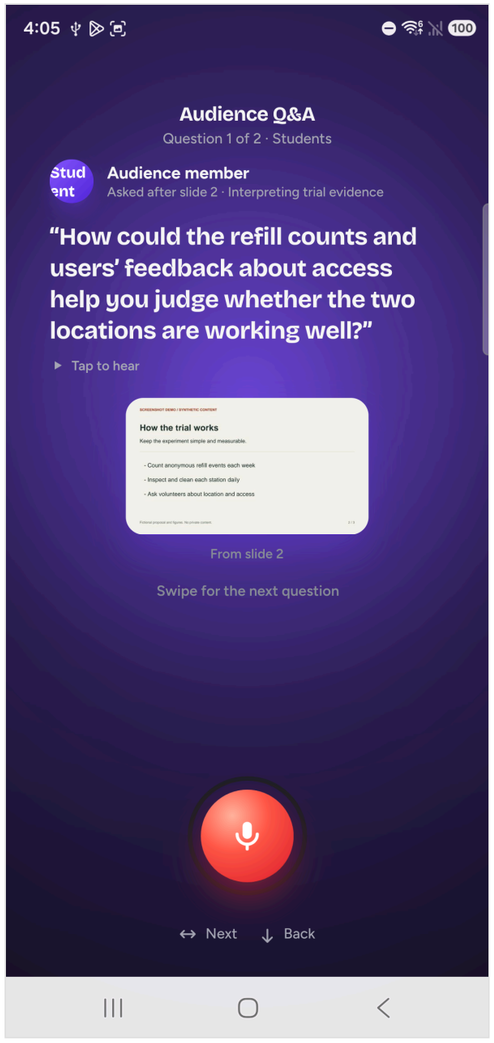


qa · Earlier saved data — 1080 × 2316 · PNG

- Opened Audience Q&A from Slide Review.
- No existing question batch is available for this presentation; the phone shows its real offline/unavailable state.
- Retry questions was not pressed; no AI request was made.

S05.1 Back to slide Review → S04 · Slide Review · second slide

S44 Audience Q&A · generated question



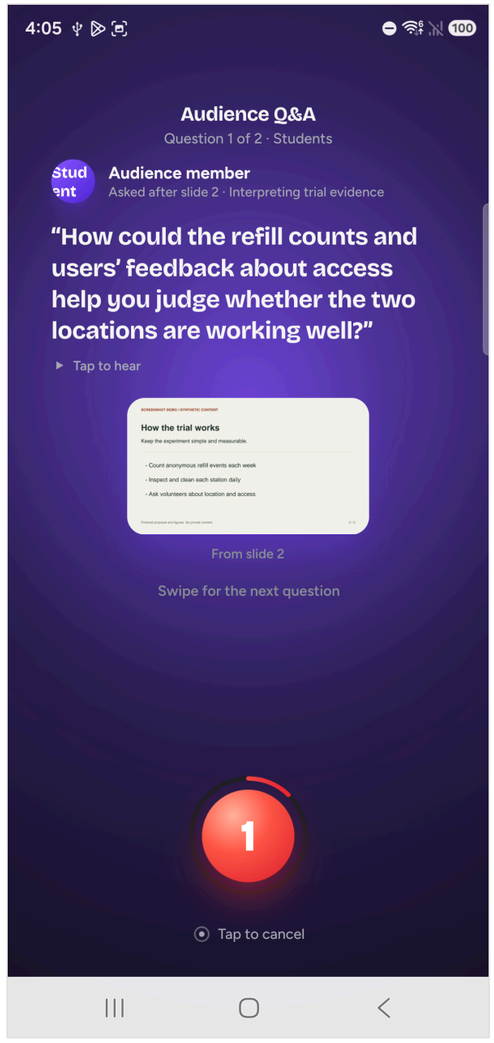
qa · New synthetic demo — 1080 × 2316 · PNG

- The actual generated first question is ready for the Students audience.
- The question is linked to the second slide of the synthetic demo.

S44.1 Tap microphone to answer → S45 · Audience Q&A · answer countdown

S44.2 Back to slide Review → S43 · Slide Review · completed score and findings

S45 Audience Q&A · answer countdown

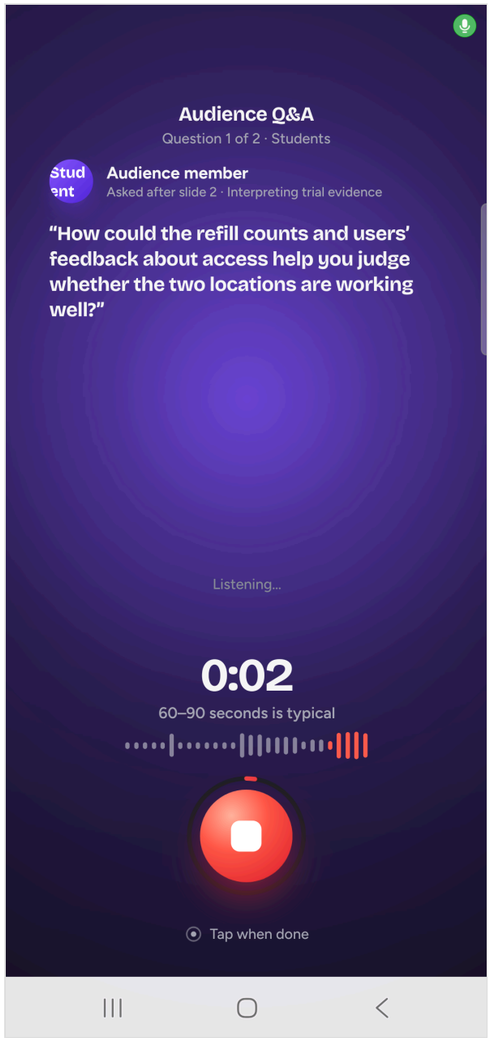


qa · New synthetic demo — 1080 × 2316 · PNG

- Actual microphone countdown before recording an answer to the displayed question.

S45.1 Countdown completes → S46 · Audience Q&A · live microphone answer

S46 Audience Q&A · live microphone answer

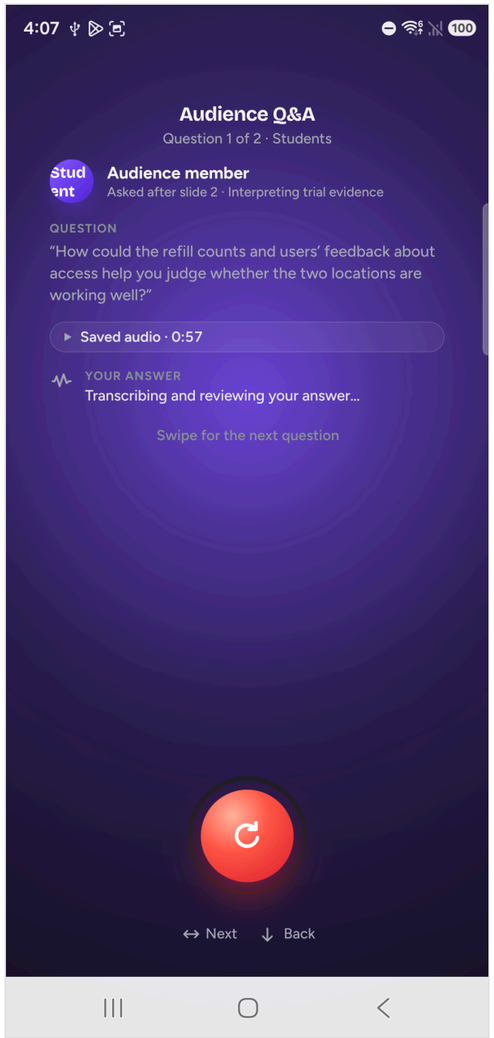


qa · New synthetic demo — 1080 × 2316 · PNG

- The phone is recording the synthetic spoken demo answer through its microphone.
- Listening, the running timer, waveform and Stop control are visible.

S46.1 Stop and save answer → S47 · Audience Q&A · transcription and evaluation

S47 Audience Q&A · transcription and evaluation

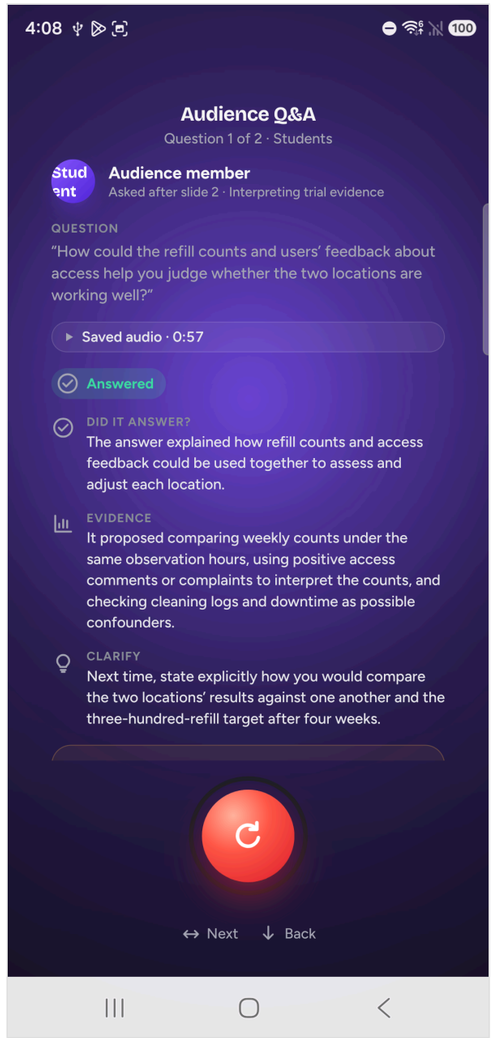


qa · New synthetic demo — 1080 × 2316 · PNG

- The recorded answer is saved; the app shows its duration and processing state.
- Transcribing and reviewing is visible; completion is not implied by this frame.

S47.1 Answer evaluation completes → S48 · Audience Q&A · evaluated answer

S48 Audience Q&A · evaluated answer



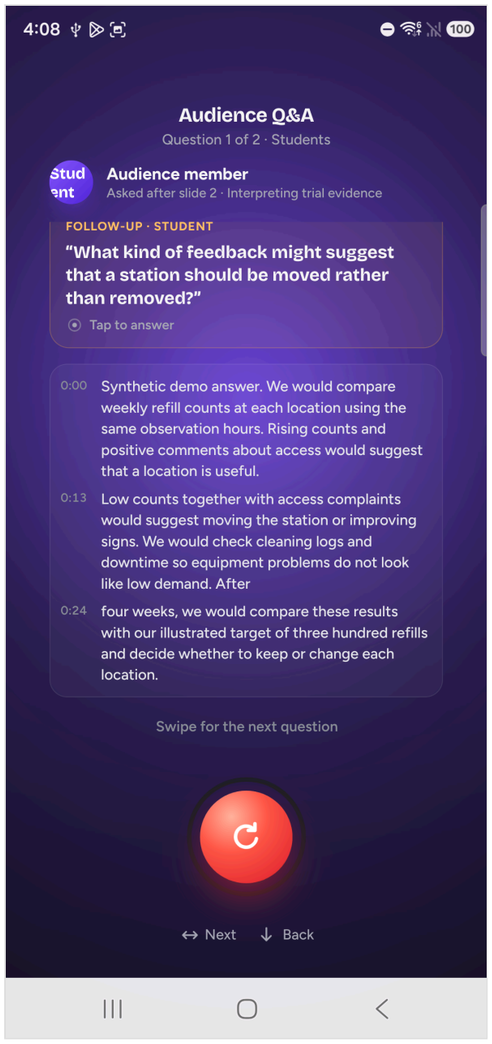
qa · New synthetic demo — 1080 × 2316 · PNG

- The saved 57-second demo answer received an actual provider evaluation and an Answered status.
- The app shows its Did it answer, Evidence and Clarify feedback sections.

S48.1 Scroll to follow-up and transcript → S49 · Audience Q&A · follow-up and answer transcript

S48.2 Back to slide Review → S43 · Slide Review · completed score and findings

S49 Audience Q&A · follow-up and answer transcript



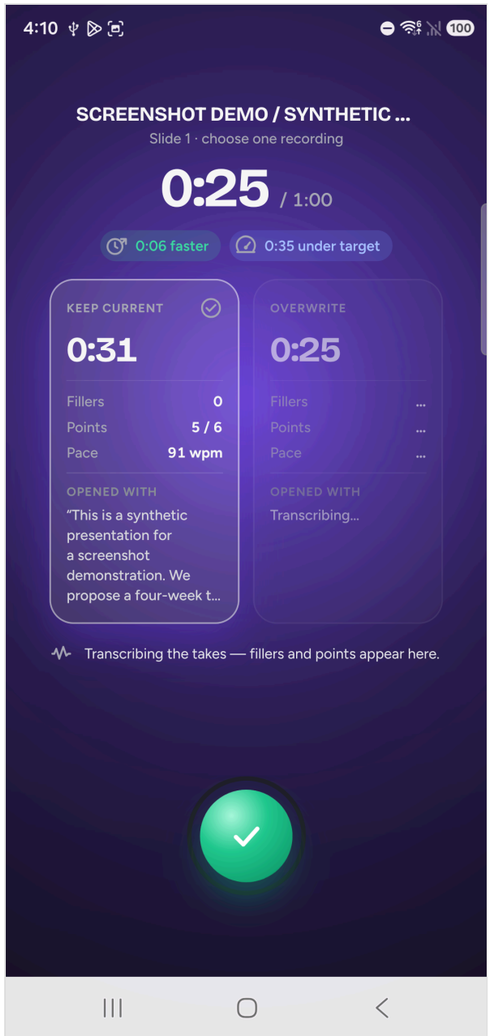
qa · New synthetic demo 1080 × 2316 · PNG

- An actual generated follow-up question and the saved answer transcript are visible.
- The follow-up is offered for recording; no follow-up answer was recorded for this capture.

S49.1 Scroll to evaluation → S48 · Audience Q&A · evaluated answer

S49.2 Back to slide Review → S43 · Slide Review · completed score and findings

S54 Compare · new take transcribing

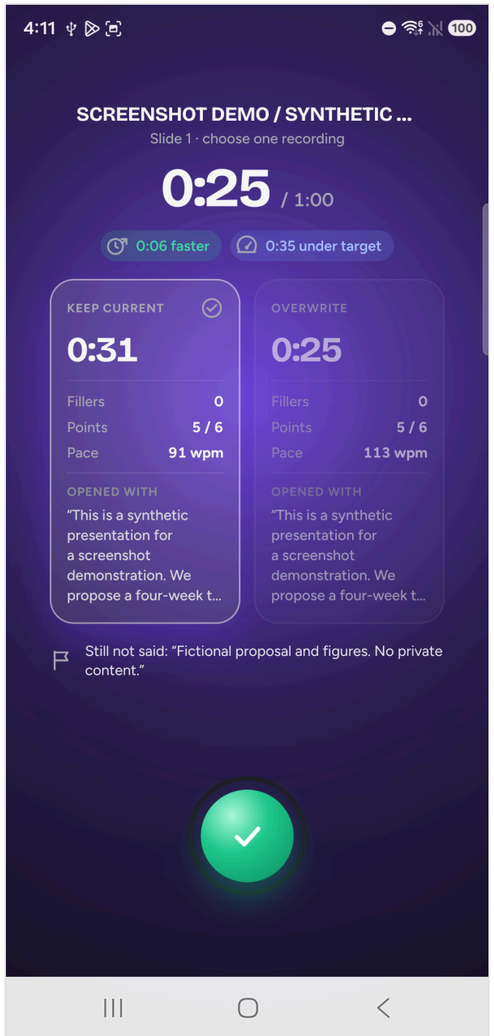


compare · New synthetic demo 1080 × 2316 · PNG

- The current 31-second take is shown beside the new 25-second take.
- The new take is still transcribing in this real intermediate frame; Keep current is selected.

S54.1 Transcription and comparison finish → S55 · Compare · completed take metrics

S55 Compare · completed take metrics



compare · New synthetic demo 1080 × 2316 · PNG

- Both real takes have transcripts and metrics: the new take is six seconds faster.
- Keep current was confirmed after capture, retaining the original full demo take.
- Confirmation opens the Review content illustrated by S43, with Back to slides in this entry context.

S55.1 Confirm Keep current and return to slide Review → S43 · Slide Review · completed score and findings

CAPTURE EVIDENCE

Scope and limitations

47 unmodified screenshots · 7 of 7 source screens represented.

The source board inventories 54 states. Screen images are real captures; navigation arrows are source-derived and do not certify that every action was executed successfully.

- Earlier screenshots preserve the original saved-data-only inspection. The user subsequently authorized live microphone, import, Q&A and review capture with synthetic demo content.
- Every screen image is an unmodified physical-phone capture; offline, unavailable and processing states are retained.
- New rehearsal and Q&A audio were recorded through the phone microphone from agent-operated synthetic speech played acoustically. This is a demonstration, not a human usability test.
- Visible provider transcripts, coaching, question and score results are actual runtime responses; intermediate pending states are labeled separately.
- The first demo transcript used the original local service. The exact saved take and media were then carried to an isolated backend to recover a persistent HTTP connection; its 110 backend source modules match PR31 and it served the later demo AI responses.
- The installed bundle's 112 imported application modules match PR31; the retained source map is local build evidence, not a signed Git identifier.
- A captured route does not establish every conditional, failure, or destructive path. The earlier source board retains the full source inventory.
- The phone was left on the new demo Full Review after Keep current preserved the original 75-second demo run; existing personal presentations were retained.
- **upload** — The genuine native PDF import succeeded and its setup is captured. The brief analysis state before setup passed before a distinct screenshot could be taken.
- **qa** — Generated questions, live answer recording, evaluation and the offered follow-up are captured. A separate follow-up answer and archive were not created.
- **conditional states** — All seven app routes are represented. Destructive choices, exhaustive error recovery and every conditional correction or editing panel were not exercised; the source wireframe board inventories the broader state space.
